NIGHT WORK ON SPAULDING TURNPIKE IN NEWINGTON AND DOVER
NORTHBOUND LANE CLOSURES FROM 11/17 THROUGH 11/20/03

The New Hampshire Department of Transportation announces night work requiring lane closures is scheduled to take place on the northbound lanes of the Spaulding Turnpike between Exits 2 and 5 in Newington and Dover.

This work will take place nightly from 8:30 PM until 6:30 AM from Monday, November 17 through the early morning of Friday, November 21, 2003. Motorists heading northbound on the Spaulding Turnpike during those time periods should anticipate lane closures.

This project involves the installation of road sensors on and near the Little Bay Bridges as part of the implementation of a Road Weather Information Station (RWIS). Information gathered from this station will assist the New Hampshire Department of Transportation with weather-related highway maintenance.

Viasala Inc. of Woburn, Massachusetts is the contractor for the \$90,000 project.
